IBM 5110 COMPUTER

The 5110 provides data entry, processing, language support, visual display and control of input/output devices for the 5110 Computing System.

HIGHLIGHTS

- Choice of two high level interactive languages, BASIC and/or APL. Both languages provide support for:
 - Choice of file access methods and file organization schemes
 - Full screen support
 - Dynamic print formatting
 - Procedure files
- Main memory sizes from 16,000 to 64,000 bytes
- Diskette and/or tape storage media
- Overlapped processing with printing
- Diskette sort feature resident in read only storage
- Support for upper/lowercase characters on visual display and printer
- Communications features provide:
 - Binary synchronous communications at rates up to 4800 baud
 - Emulation of either an IBM 2770 or IBM 3741 as a binary synchronous terminal
 - Start stop communications support at rates up to 300 baud with emulation of IBM 2741
- Serial and Parallel I/O channel features for expanded capabilities in attaching additional I/O devices (i.e. plotters, instrumentation, etc.).
- Optional Attachment of:
 - IBM 5103 Printer
 - IBM 5106 Auxiliary Tape Unit
 - IBM 5114 Diskette Unit(s)
